Overview 课程简介:

Online Programme of the *Summer Institute* here at Oriol College Oxford

Our Online Programme is a new form of academic offering of the *Summer Institute* here at Oriol College Oxford. This programme provides delegates from all over the world with a unique opportunity to experience the world's most renowned academia.

Oriol College (University of Oxford, UK)

Oriol College is one of the 39 colleges that make up the University of Oxford (UK). It was founded in 1326 by King Edward II, making it not only the fifth oldest college in the university, but also the oldest royal foundation in the entire city of Oxford. In recognition of this royal connection, the college was once known as King's College.

Academic Tracks and Courses 专业学术课程

The academic course offerings are under the following five tracks:

Law

Legal and Socio-legal Theory and Intellectual Property Rights

This course will provide an in-depth knowledge of the functions of the rule of law in common law jurisdictions, as well as to consider law in a practical manner.

EU Corporate Law

The course consists of the legal topics of companies operating in the United Kingdom.

Economics & Business

Entrepreneurship: Evaluation Creation and Funding of New Ventures

This is a growing and ever-changing field and this course will balance insights from famous cases and research into the field with the overall aim to provide a foundational knowledge on the practicalities of entrepreneurship.

Economics of Industry: Strategic Choices, Market Concentration, and Competition Policy

The economics of industry is concerned with the behaviour of firms. This course covers both theory and applications.

Literature & History

An Actor's Approach to Shakespeare

This course of lectures will introduce students to a range of Shakespeare's plays and poems from the point of view of actors and directors approaching this material in preparation for performance.

British History: the Tudor Period

This course is designed for all students interested in history and politics and will be useful for students who wish to gain an insight into the nature of power, and how power is exercised in the context of modern governments.

Science & Medicine

Microelectronic Circuits and Analogue Devices

This course provides a brief yet comprehensive description of standard electronic devices and circuits.

Cryogenic Engineering: Cryocoolers for Space

This course starts by going over the first and second laws of thermodynamics and then explores a number of relevant thermodynamic cycles in detail.

The Health of Nations: Current Challenge and Future Possibilities

This course will provide an overview of the causes and the events of the recent 'global' financial crisis, as well as of the policy response by governments and central banks.

Quantum Computing

Quantum groups appear in many areas of mathematics and mathematical physics such as representation theory, non-commutative geometry, knot invariants, conformal field theory and topological quantum field theory.

Introduction to Nanomaterial

The course provides essential knowledge on the fundamentals of nanomaterials and their applications in making today's and future devices.

Dynamic Behaviour of Materials

This course will introduce students to the effect of rapidly applied loads to different categories of solid materials.

Stem Cell Biology: Embryonic and Adult Stem Cells

The course will be focused on stem cell biology and in particular on embryonic stem cells, the stem cells that have the potential to create all the cell types of the adult body.

Philosophy, Politics and Economics (PPE) & International Relations

International Governance of the Future

The main purpose of this course is to expose delegates to emerging topics in International Governance, topics that their generation will have to engage with and address effectively.

Contemporary PPE – Ethics and Logic

Through a selection of texts and case studies drawn from the history of Western philosophical ethics, this course will offer a perspective on how ethical discourse and debate were and remain deeply informed by the language and tools of logic.
